

IN THE CLAIMS:

Withdrawn claim 14 is canceled herein. Claim 15 has been amended herein. New claim 19 is to be added. All of the pending claims 1 through 13 and 15 through 19 are presented below. This listing of claims will replace all prior versions and listings of claims in the application. Please enter these claims as amended.

Listing of the Claims:

1. (Original) A method of inducing or enhancing production or secretion of at least one secondary metabolite by plant cells, said method comprising:

transforming plant cells with an expression vector comprising an expression cassette comprising a gene encoding an ABC-transporter;

selecting transformed plant cells having an induced or enhanced production or secretion of at least one secondary metabolite; and

propagating such selected transformed plant cells.

2. (Original) The method according to claim 1 wherein the secondary metabolites are alkaloids.

3. (Original) The method according to claim 1 wherein the ABC-transporters are of plant, fungal, or mammalian origin.

4. (Original) The method according to claim 1 wherein the induction or enhancement of the production of at least one secondary metabolite by plant cells results from enhancing the transport of said secondary metabolite into a vacuole.

5. (Original) The method according to claim 4 wherein the secondary metabolites are alkaloids.

6. (Original) The method according to claim 4 wherein the ABC-transporters are of plant, fungal, or mammalian origin.

7. (Original) A method of stimulating the production of secondary metabolites by plants, the method comprising:

transforming said plants with an expression vector comprising an expression cassette comprising a gene encoding an ABC-transporter;

selecting transformed plants based upon enhanced production of secondary metabolites, and

propagating such selected transformed plants.

8. (Original) The method according to claim 7 wherein the secondary metabolites are alkaloids.

9. (Original) The method according to claim 7 wherein the ABC-transporters are of plant, fungal, or mammalian origin.

10. (Original) A transgenic plant cell culture displaying an enhanced production or secretion of at least one secondary metabolite, wherein said transgenic plant cell is transformed with an expression vector comprising an expression cassette comprising a gene encoding an ABC-transporter.

11. (Original) The transgenic plant cell culture of claim 10 further characterized in having

- (1) an increased vacuolar localization of said at least one secondary metabolite, or
- (2) a secretion or an increased secretion of said at least one secondary metabolite.

12. (Original) A transgenic plant material selected from the group consisting of a plant, plant cells, plant seeds and plant progeny, said transgenic plant material capable of an enhanced production or secretion of at least one secondary metabolite, said transgenic plant material transformed with an expression vector comprising an expression cassette comprising a gene encoding an ABC-transporter.

13. (Original) The transgenic plant material of claim 12 further characterized in having an increased vacuolar localization of said at least one secondary metabolite.

14. (Canceled).

15. (Currently amended) An isolated polynucleotide sequence selected from the group consisting of:

- _____ (a) an isolated polynucleotide comprising a polynucleotide sequence of SEQ ID NO:1[[;]] and
- _____ (b) ~~an isolated polynucleotide comprising a polynucleotide sequence having at least 91% identity to SEQ ID NO:1 that, when expressed, induces or enhances the production and/or secretion of at least one secondary metabolite in plants or plant cells;~~
- _____ (c) an isolated polynucleotide encoding the polypeptide sequence of SEQ ID NO:2;
- _____ (d) ~~an isolated polynucleotide comprising a polynucleotide sequence having at least 91% identity to polynucleotide encoding the polypeptide sequence of SEQ ID NO:2 that, when expressed, induces or enhances the production and/or secretion of at least one secondary metabolite in plants or plant cells; and~~
- _____ (e) ~~fragments and variants of the isolated polynucleotides of (a) through (d) that, when expressed, induce and/or enhance the production or the secretion of at least one secondary metabolite in plants or plant cells.~~

16. (Original) A process for producing a plant cell exhibiting an enhanced production or secretion of at least one secondary metabolite, said process comprising:

transforming a plant cell with an expression cassette comprising a gene encoding an ABC-transporter; and

selecting transformed plant cells exhibiting enhanced transport of said at least one secondary metabolite into a vacuole.

17. (Original) A plant cell produced by the process of claim 16.

18. (Original) A transgenic plant including the plant cell of claim 17.

19. (New) An isolated polynucleotide useful for producing a plant cell exhibiting an enhanced production or secretion of at least one secondary metabolite, said isolated polynucleotide comprising:

a first sequence of nucleotide bases constituting a means for inducing or enhancing production or secretion of at least one secondary metabolite in plants or plant cells, and

a second sequence of nucleotides bases, operatively positioned with respect to said first sequence, constituting a means for promoting expression of said first sequence.
